Subject: Beta Offshore August Results
Attachments: removed.txt

Good Afternoon,

Thank you for your patience! I was able to look through all the past emails and chemist work sheets to remember this work order's specifics.

Beta Offshore requested that metals be analyzed along with Oil and Grease for sample #1 from the single bottle that was supplied for that sample. After receiving the client's approval for deviating from the methods, we used part of the sample for the metals analysis, and only 500 mL for the Oil and Grease. After that report went out, Beta Offshore decided that they wanted the rest of the three samples run using the entire bottle, to stay in line with the method. For those samples, the entire bottle was used for Oil and Grease.

If you need any further clarification, please let me know.

Thank you,
Nicole Scott
